# Welcome

## Our 36th Year

Welcome to the thirty-sixth Annual Boston University Conference On Language Development. Since 1976, BUCLD has been organized by graduate students in Boston University's Program in Applied Linguistics. With years of student work and the help of faculty advisors, the conference has become an international gathering of linguists, psychologists, and other researchers of language acquisition and development. We thank our participants for the research accomplishments they have shared with us over the past thirty-five years.

## New This Year

Please note that this year, the NIH and NSF session entitled **"What's Hot and How to Apply"**, to be facilitated by Peggy McCardle (NIH) and Joan Maling (NSF), will be held on **Friday at 8:00 AM** in the Conference Auditorium.

Please also note that this year the book exhibits will run from 9:00 AM to 5:00 PM on Friday, and from 10:00 AM to 6:00 PM on Saturday. There will be no exhibits on Sunday; purchased books may be picked up on Sunday before 1:00 PM.

## Invited Speakers

At this year's conference, we are honored to have Sandra Waxman and Cornelia Hamann as our featured speakers. Sandra Waxman will present Friday's keynote address, entitled "What's in a word? Links between linguistic and conceptual organization in infants and young children." Saturday's program will close with Cornelia Hamann's plenary address, "Bilingual development and language assessment." This year's symposium, to be held during Saturday's lunch period, is entitled "Morphology in second language acquisition and processing" and will feature speakers Harald Clahsen, Holger Hopp, Donna Lardiere, and Silvina Montrul.

## Paper and Poster Presentations

The rest of the program is devoted to a wide range of papers and posters chosen from submitted abstracts. This year we received 479 submissions, each of which was sent out to five reviewers for anonymous review. Of these, 81 papers and 72 posters were selected for presentation, with an acceptance rate of 34%. We are sorry not to have had space to include more of the many excellent submissions we received. We have also included abstracts for those who generously agreed to serve as alternates in case of cancellations.

## Proceedings

Once again this year we will be publishing the Proceedings of the Conference, which includes papers presented and those selected for alternate status. Information about ordering copies is available in your handbook and at the Cascadilla Press table during the book exhibit. We will also have an online supplement to the proceedings for papers given as posters, which will be published on the web by BUCLD.

Here at Boston University, we are committed to providing an ongoing forum for work in the diverse field of language development. We hope you will enjoy the conference!

### The 2011 Conference Organizing Committee

Alia Biller  
Esther Chung  
Amelia Kimball

### Faculty Advisors

Paul Hagstrom  
Cathy O'Connor

### Chairs

Sarah Baiz

For general information about the conference, visit our website at <http://www.bu.edu/buclid>.

## Acknowledgements

The Boston University Conference on Language Development is organized each year by students from the Program in Applied Linguistics. Every year, we depend upon the proceeds generated by registration and exhibition fees to cover the costs of hosting the conference, and we are very grateful to all of our participants for providing this support. In addition, this year's conference is supported in part by the National Science Foundation under Grant No. BCS-0548399 and the National Institutes of Health under Grant No. R13 HD042130-09, for which we are also grateful.

We would like to thank the many graduate and undergraduate students who contributed their time and effort both throughout the past year and during this weekend. We are particularly thankful to the faculty and staff of the Program in Applied Linguistics and the School of Education for their support and encouragement.

We extend special thanks to our faculty advisors, Paul Hagstrom and Cathy O'Connor, for the care and guidance that have helped to ensure a successful conference. Their expertise and support have been invaluable.

We would also like to acknowledge the efforts of several vital offices at Boston University. Our thanks go to Dawn Quinlan of Events and Conferences, whose skill and experience have provided us with the proper equipment, facilities, and refreshments for the conference. We would also like to thank Jeanette Ocampo Welch and Rafael Trevino of Disability Services for providing American Sign Language interpreters, and Stan Gurczak of Student Production Services for bringing us a new lighting system for the interpreting team. Finally, our thanks go to Marianne Taylor and Liz Politis for their support in managing the conference finances, and to Benjamin Fenster, Lisa Wong, and Jennifer Pereira for collaborating on the maintenance of our online registration system.

Once again, we were fortunate to be able to use Pasha, the abstract review software developed by Ezra Van Everbroeck at the University of California at San Diego, in our online review process. We continue to be grateful for the generosity of our colleagues in the Linguistics Department at UCSD.

Finally, we would like to thank the 166 reviewers listed below who read and rated the abstract submissions we received this year. The high quality of the abstracts makes it especially difficult to assemble a program of just 81 papers and 72 posters. We are particularly grateful for their thoughtful attention to each submission.

# General Information

## Registration and Session Locations

All sessions will be held in the George Sherman Union located at 775 Commonwealth Avenue. Registration will take place in the second floor lobby (see diagram on the back of the front cover). You may register on Friday starting at 8:00 AM, or Saturday and Sunday starting at 8:30 AM. Please register before attending any sessions. We rely greatly upon registration fees to cover the costs of the conference. We appreciate your willingness to wear your name badge; you may be asked to present it before entering sessions.

## Plenary Events

- The **Keynote Address** will be delivered by Sandra Waxman on Friday at 7:45 PM in Metcalf Large. Poster Session I (unattended) will immediately follow in Metcalf Large. Desserts will be served in the Ziskind Lounge.
- The **Plenary Address** will be given by Cornelia Hamann on Saturday at 5:45 PM in Metcalf Large. Poster Session II (unattended) will immediately follow in Metcalf Large. Hors d'oeuvres will be served in the Ziskind Lounge.
- A **Lunchtime Symposium** entitled “Morphology in second language acquisition and processing” with presentations from Harald Clahsen, Holger Hopp, Donna Lardiere, and Silvina Montrul will be held on Saturday at 12:15 PM in Metcalf Large.

## Poster Sessions

- **Poster Session I:** On Friday, 41 posters will be on display in Metcalf Large. There will be one attended Poster Session at 3:00 PM, and an additional unattended session at 9:00 PM. Refreshments will be available at both sessions.
- **Poster Session II:** On Saturday, 39 posters will be on display in Metcalf Large. There will be one attended Poster Session at 3:15 PM, and an additional unattended session at 7:00 PM. Refreshments will be available at both sessions.

## Special Sessions

- A special session entitled “**What’s Hot and How to Apply**” will be facilitated by Peggy McCardle (NIH) and Joan Maling (NSF) on Friday at 8:00 AM in the Conference Auditorium.
- The **Society for Language Development** will hold its annual symposium, “Connections between written language and spoken language,” on Thursday, November 3 at 1:00 PM in Metcalf Large, with a reception following immediately in Metcalf Small. Speakers include Charles Perfetti, Rebecca Treiman, and Mark Seidenberg.
- **NSF and NIH consultation** hours will be held in the Ziskind Lounge. NIH hours will be held on Friday from 9:30 AM to 12:00 PM and from 2:30 to 5:00 PM. NSF hours will be held on Saturday from 9:30 AM to 12:00 PM and from 2:30 to 5:00 PM.
- A **BUCLD Business Meeting** will be held on Friday from 12:30 to 1:45 PM in the Conference Auditorium.

## Additional Information

- **Parking** is available at the Agganis Arena Garage (925 Commonwealth Avenue) for \$1 per hour and at the Warren Towers Garage (700 Commonwealth Avenue) for \$12 per car per day. Please mention that you are with BUCLD, if asked. Free on-street parking is also available on Sunday. More information can be found at <http://www.bu.edu/parking>.
- **Temporary luggage storage space** is available next to the registration desk. The area will be staffed during conference sessions only. Although a student volunteer will be present in the registration area, participants leave their luggage at their own risk.

## General Information

- A **nursing room** will be available for nursing mothers in GSU 310-311.
- **Wireless internet access** is available throughout the GSU. Information for connecting is given in the box below.
- **Refreshments** will be served in Ziskind Lounge before the morning sessions and during breaks, and during poster sessions. A list of local restaurants is available at the information table. The Food Court on the ground floor of the George Sherman Union offers a wide selection, but is cash-only.
- **The 37th Annual Boston University Conference on Language Development** is tentatively scheduled for November 2 - 4, 2012, at Boston University.

The Registration desk provides the following services:

ASL Interpreters (Please inquire when you arrive) \* Lost and Found \* Campus Maps \* MBTA Maps \* General Information

### INTERNET INFO

**Guest ID: 126080**

**Account Name: bucl36**

### NIH/NSF Consultation Hours

Peggy McCardle (NIH) and Joan Maling (NSF)

NIH: Friday 9:30 AM - 12:00 PM & 2:30 - 5:00 PM

NSF: Saturday 9:30 AM - 12:00 PM & 2:30 - 5:00 PM

## Schedule at a Glance

### Thursday, November 3

1:00 PM - 5:00 PM	Society for Language Development Annual Symposium
-------------------	---

### Friday, November 4

8:00 AM	Registration begins
8:00 AM - 9:00 AM	Funding Symposium
9:00 AM - 5:00 PM	Book exhibits
9:00 AM - 10:30 AM	Talks
10:30 AM - 11:00 AM	Morning break with refreshments
11:00 AM - 12:30 PM	Talks
12:30 PM - 2:00 PM	Lunch break / BUCLD business meeting
2:00 PM - 3:00 PM	Talks
3:00 PM - 4:15 PM	Poster Session I attended with refreshments and afternoon break with refreshments
4:15 PM - 5:45 PM	Talks
5:45 PM - 7:45 PM	Dinner break
7:45 PM - 9:00 PM	Keynote Address
9:00 PM - 9:45 PM	Poster Session I unattended with refreshments

### Saturday, November 5

8:30 AM	Registration begins
9:00 AM - 10:30 AM	Talks
10:00 AM - 6:00 PM	Book exhibits
10:30 AM - 11:00 PM	Morning break with refreshments
11:00 AM - 12:00 PM	Talks
12:15 PM - 2:15 PM	Lunch Symposium
2:15 PM - 3:15 PM	Talks
3:15 PM - 4:30 PM	Poster Session II attended with refreshments and afternoon break with refreshments
4:30 PM - 5:30 PM	Talks
5:45 PM - 7:00 PM	Plenary Address
7:00 PM - 7:45 PM	Poster Session II unattended with refreshments

### Sunday, November 6

8:30 AM	Registration begins
9:00 AM - 10:30 AM	Talks
10:30 AM - 11:00 AM	Morning break with refreshments
11:00 AM - 1:00 PM	Talks

**FRIDAY, NOVEMBER 4**

<b>Time</b>	<b>Session A (Metcalf Small)</b>	<b>Session B (East Balcony)</b>	<b>Session C (Conference Auditorium)</b>
8:00	NSF/NIH Funding Symposium: What's hot and how to apply (Conference Auditorium)		
9:00 - 5:00	<b>BOOK EXHIBIT</b>		
9:00	R. Scott, C. Fisher: Lexical pre-exposure facilitates the use of cross-situational information in verb learning	J. de Villiers, T. Roeper, E. Harrington, E. Gadilaukas: Tense and Truth in Children's Question Answering	J. Hochmann, S. Benavides-Varela, M. Nespore, J. Mehler: Emergence of the functional specialization of consonants and vowels in language acquisition
9:30	S. Arunachalam, K. Syrett, S. Waxman: Can adverbs call attention to manner of motion for 2-year-olds learning verbs?	K. Miller: Variable Input: What Sarah reveals about the link between the RI Stage and the use of non-agreeing <i>don't</i>	L. Nishibayashi, T. Nazzi: Asymmetry in consonant/vowel processing: evidence from early word segmentation
10:00	M. Kline, J. Snedeker, L. Schulz: Preschoolers prefer to map novel transitive verbs to events with spatiotemporal features that mark causation	F. Arosio, B. Hollebrandse, W. Dressler et al.*: The acquisition of tense in 17 languages	N. Gonzalez Gomez, T. Nazzi: Evidence of phonological feature constraints on the acquisition of phonological dependencies
10:30	<b>BREAK (Ziskind Lounge)</b>		
11:00	J. Trueswell, D. Kaufman, A. Hafri, J. Lidz: Development of parsing ability interacts with grammar learning: Evidence from Tagalog and Kannada	S. Armon-Lotem, S. Chiat: How do sequential bilingual children perform on non-word repetition tasks?	A. Cristia, S. Peperkamp: Generalizing without encoding specifics: Infants infer phonotactic patterns on sound classes
11:30	A. Bungler, J. Trueswell, A. Papafragou: Information Packaging for Causative Events: Cross-Linguistic Differences and Implications for Language Production and Attention	M. Woodley: Word and Sound Processing in Bilingual Preschoolers	J. Ren, J. Morgan: The Devil in the Details: Underspecification in Infants' and Adults' Lexical Representations
12:00	W. Lee, H. Song: Korean children's sensitivity to case markers when interpreting a novel verb	I. Elgort: The what, the why and the how: Second language vocabulary development from reading	R. van de Vijver, D. Baer-Henney: Voiceless, front more. On the development of knowledge of voicing and vowel alternations in German nouns by 5 year-olds, 7 year-olds and adults
12:30	<b>LUNCH BREAK/ BUCLD BUSINESS MEETING (Conference Auditorium)</b>		
2:00	C. Schroeder, J. Holzgrefe, I. Wartenburger, B. Hoehle: Perception and weighting of prosodic boundary cues in eight-month-old German infants	E. Kim: The role of islands in processing English as a second language	J. Pyers, J. Lu, R. Magid, D. Gentner, K. Emmorey: Acquisition of spatial language in American Sign Language is linked to spatial cognition
2:30	S. Frota, J. Butler, S. Correia, C. Severino, M. Vigário: Pitch first, stress next: Prosodic effects on word learning in an intonation language	S. Baek: Locus of difference in sentence processing between native and second language	R. Montana, L. Abarbanell, P. Li: Revisiting the plasticity of human spatial cognition
3:00	<b>ATTENDED POSTER SESSION I (Metcalf Large and Ziskind Lounge)</b>		
4:15	D. Yurovsky, L. Smith, C. Yu: Statistical Word Learning from a First-Person Perspective	S. van der Feest, E. Johnson: Input driven differences in Dutch toddler's perception of a disappearing phonological contrast	M. Sutton, M. Fetters, J. Lidz: Parsing for Principle C at 30 Months
4:45	T. Poeppel, C. Gerfen, D. Weiss: Context, mutual exclusivity and the challenge of multiple mappings in word learning	K. Gonzales, R. Gomez, L. Gerken: 12-month-olds use voice and temporal cues to extract structure that only one of two speakers produces consistently	S. Nitschke, S. Brandt, E. Kidd: Experience and Processing of Relative Clauses in German
5:15	B. Malt, E. Ameel, G. Storms: Comprehension and Later Lexical Development	S. Jiménez, S. Creel: Factors affecting talker recognition in preschoolers and adults	N. Hahn, J. Snedeker: 6-9 year olds use prosody to resolve temporary syntactic closure ambiguity
5:45	<b>DINNER BREAK</b>		
7:45	<b>KEYNOTE ADDRESS: (Metcalf Large)</b> "What's in a word? Links between linguistic and conceptual organization in infants and young children" Sandra Waxman, Northwestern University		
9:00	<b>UNATTENDED POSTER SESSION I (Metcalf Large and Ziskind Lounge)</b>		

**SATURDAY, NOVEMBER 5**

<b>Time</b>	<b>Session A (Metcalf Small)</b>	<b>Session B (East Balcony)</b>	<b>Session C (Conference Auditorium)</b>
10:00 - 6:00	<b>BOOK EXHIBITS</b>		
9:00	A. Finn, C. Hudson Kam: When it hurts (and helps) to try: What happens when adult learners try to learn novel statistics to segment words and categories	L. Dominguez, H. Song, G. Hicks: Reanalysing the L2 acquisition of English anaphoric binding: A feature-based approach	C. Noble, C. Rowland, A. Chan: Competition all the way down: How children learn word order cues to sentence meaning
9:30	C. Kurumada, S. Meylan, M. Frank: Statistical word segmentation of Zipfian frequency distribution	K. Park, B.D. Schwartz: L1-Korean L2ers' Sensitivity to Givenness in the English Dative Alternation	B. Ambridge: The retreat from overgeneralization: Frequency, verb semantics or both?
10:00	C. Lignos: The Journey to Word Segmentation	J. Culbertson, P. Smolensky, G. Legendre: Statistical learning constrained by syntactic biases in an artificial language learning task	G. Krajewski, A. Siebenborn, E. Lieven: The shape of frequency distribution and novel construction learning
10:30	<b>BREAK (Ziskind Lounge)</b>		
11:00	K. Graf Estes, S. Bowen: Constraints on infant word learning: The effects of stress and phonotactic patterns	R. Orfittelli: 'Experiencing' a slight delay: Intervening arguments and the acquisition of subject-to-subject raising	J. Rothman, D. Pascual y Cabo, A. Lingwall: Applying the Interface Hypothesis to Heritage Speaker (HS) Acquisition: Evidence from Spanish Mood
11:30	C. Fennell, K. Byers-Heinlein: Monolingual and Bilingual Infants' Use of Atypical Phonetic Information in Word Learning	S. Kirby: Raising is Birds, Control is Penguins: Solving the learnability paradox	D. Lillo-Martin, H. Koulidobrova, R. de Quadros, D. Chen Pichler: Bilingual Language Synthesis: Evidence from Wh-questions in Bimodal Bilinguals
12:15	<b>LUNCH SYMPOSIUM: (Metcalf Large)</b> "Morphology in second language acquisition and processing" Harald Clahsen, University of Essex/University of Potsdam Holger Hopp, University of Mannheim Donna Lardiere, Georgetown University Silvina Montrul (organizer), University of Illinois at Urbana-Champaign		
2:15	L. Mesite, J. Dixon, S. Tek, D. Fein, L. Naigles: Early grammatical growth over time distinguishes two subgroups of children with ASD	A. Perez-Leroux, A. Castilla, D. Massam, S. Bejar: The acquisition of NP recursion in English-speaking children	J. Sullivan, K. Davidson, D. Barner: Conversational implicature in 3- to 8-year-old children
2:45	J. Park, S. Tek, D. Fein, L. Naigles: Early joint attention predicts children's subsequent performance on preferential looking tasks	K. Sugisaki: A Constraint on Argument Ellipsis in Child Japanese	U. Minai, N. Takami: Semantic and Pragmatic Meaning of the Existential Quantifier <i>Some</i> in Second Language Acquisition
3:15	<b>ATTENDED POSTER SESSION II (Metcalf Large and Ziskind Lounge)</b>		
4:30	M. Connor, C. Fisher, D. Roth: The Origins of Syntactic Bootstrapping: A Computational Model	T. Sano: Abstract CP/IP configuration in child Japanese	D. Tanner, J. Nicol, J. Herschensohn, L. Osterhout: Electrophysiological markers of interference and structural facilitation in native and nonnative agreement processing
5:00	C. Yang: Usage Unevenness in Child Language Supports Grammar Productivity	S. Unsworth: Testing for crosslinguistic influence and exposure effects in the bilingual acquisition of specific indefinite objects	Z. Wen, B.D. Schwartz: Task effects in L2 online processing of subject verb number agreement
5:45	<b>PLENARY ADDRESS: (Metcalf Large)</b> "Bilingual development and language assessment" Cornelia Hamann, University of Oldenburg		
7:00	<b>UNATTENDED POSTER SESSION II (Metcalf Large and Ziskind Lounge)</b>		

SUNDAY, NOVEMBER 7

Time	Session A (Metcalf Small)	Session B (East Balcony)	Session C (Conference Auditorium)
9:00	C. Cantiani, M.T. Guasti, P. Perego, M.L. Lorusso: Impaired inflectional morphology in children with Developmental Dyslexia: converging evidence from behavioral and electrophysiological measures	J. Hartshorne, D. Barner: How do children interpret number words before learning their exact meanings?	B. Pajak, R. Levy: Distributional learning of L2 phonological categories by listeners with different language backgrounds
9:30	Y.H. Yu, N. Choudhury, C. Cantiani, V.L. Shafer, M. MacRoy-Higgins, R.G. Schwartz, A. A. Benasich: Electrophysiological correlates of picture-word processing in three-to-seven year old non-verbal children with Autism	K. Syrett, H. Baker, A. Kalkstein, J. Musolino: Let's disambiguate sentences <i>together</i> : What children know about the semantics of <i>together</i> , and where pragmatics steps in	C. Quam, S. Creel: What's in a Rise? Effects of Language Experience on Interpretation of Lexical Tone
10:00	M. Maguire, D. Ogiela, G. Magnon, B. Delarosa, L. Sides: Developmental differences in noun-object and verb-action identification: An Event Related Potentials study	N. Katsos et al**: To what extent does the development of conceptual categories depend on language?	R. Mayberry, M. Hatrak, H. Morgan: Age of Acquisition Affects the Learning of Phonological Structure in ASL
10:30	<b>BREAK (Ziskind Lounge)</b>		
11:00	C. Ngon, A. Martin, E. Dupoux, S. Peperkamp: Words, words, and non-words: Learning a pseudo-lexicon during the first year of life	N. Vasić, V. Chondrogianni, T. Marinis, E. Blom: Production and processing (a)symmetries in the acquisition of gender by Dutch and Greek sequential bilingual children	L. Shneidman, S. Goldin-Meadow: Mayan and US Caregivers Simplify Child Directed Speech
11:30	A. Mitchel, D. Weiss: Visual speech segmentation: Using facial cues to locate word boundaries in continuous speech	J. Alemán Bañón, A. Gabriele, R. Fiorentino: Examining development in second language processing: An ERP investigation of gender and number agreement in L2 Spanish	E. Cartmill, T. Medina, B. Armstrong, S. Goldin-Meadow, J. Trueswell, L. Gleitman: Quality and Quantity of Early Word Learning Environments Together Predict Child Vocabulary Size at 50 Months
12:00	C. Lew-Williams, J. Saffran: All words are not created equal: Expectations about word length guide infant statistical learning	B. Lopez Prego, A. Gabriele: Examining the nature of variability in gender and number agreement in native and nonnative Spanish	A. Weisleder, A. Fernald: Richer language experience leads to faster understanding: Language input and processing efficiency in diverse groups of low-SES children
12:30	T. Mintz: Fifteen-month-old infants can categorize words using distributional information alone and retain the categories after 1 week	C. Renaud: Pronoun resolution in L2 French: Processing evidence for the role of (grammatical) gender	E. Ko: Nonlinear development of speaking rate in child-directed speech

## Words and things: Linking infants' early conceptual and linguistic capacities

Sandra Waxman  
Northwestern University

To learn the meaning of any novel word, infants must set their sights in two distinct directions. Facing the conceptual domain, they must identify concepts that capture the various relations among the objects and events that they encounter. Facing the linguistic domain, they must cull words and phrases from the melody of the human language in which they are immersed. Findings from our laboratory, among others, have revealed that even before they begin to speak, infants' advances in each of these domains are powerfully linked. In this talk, I will argue that infants begin with a broad universal initial link between the linguistic and conceptual systems, and that this sets the stage for increasingly precise links between different kinds of words (e.g., noun, verb) and different kinds of meanings. I will then present new evidence from infants as young as 3- and 4-months of age. Together, the work reveals that throughout development, naming is a powerful engine, fueling the acquisition of the essential, rich relations that characterize our most powerful concepts.

**LUNCH SYMPOSIUM**

Morphology in Second Language Acquisition and Processing

*Silvina Montrul, University of Illinois at Urbana-Champaign*

One of the most challenging linguistic areas to master by adult second language learners is morphology. Even at very advanced levels of proficiency, learners experience non-native production (omissions and substitutions) of gender, agreement, tense, etc. Morphological variability in production and comprehension and the source of these errors have been intensely debated in second language acquisition, with some models invoking deficits at the representational level and others with language processing. This colloquium will present the most recent research on the representational problem (Lardiere), and the processing problem of inflectional (Hopp) and derivational morphology (Clahsen) and discuss whether and how second language speakers differ (or not) from native speakers.

**LUNCH SYMPOSIUM**

Modeling morphological competence in a second language: a feature-based approach.

*Donna Lardiere, Georgetown University*

There are several possible points along the “computational path” in the production and comprehension of inflectional morphology for breakdowns to occur, depending on whether an abstract morphosyntactic feature, its phonological exponence, and its various conditioning factors have been completely acquired (morphological knowledge), and/or whether a learner can access or process a form quickly enough in real time (morphological performance). This talk will focus on the feature/competence side of the problem, illustrating with an example from native English speakers’ difficulty in acquiring L2 Korean pluralization. Preliminary results from an ongoing SLA study (in collaboration with Sun Hee Hwang) will be presented and discussed.

**LUNCH SYMPOSIUM**

The on-line integration of inflection in L2 processing: Evidence from visual world eyetracking

*Holger Hopp, University of Mannheim*

Recent research investigates whether inflectional variability in adult L2 production and comprehension relates to problems in accessing and integrating morphology in the real-time processing of the L2. In this paper, I report a visual-world eyetracking study that explores whether advanced to near-native L1 English speakers use gender and number cues predictively in processing complex determiner phrases (DPs) in German. In particular, the study investigates whether L2ers exploit inflectional cues differently depending on their type (gender vs number) and their realization in the DP (on determiners vs adjectives). The results will be discussed in the context of current approaches to inflectional variability in adult L2 acquisition and processing.

**LUNCH SYMPOSIUM**

Derivational and inflectional processes in native and non-native language comprehension: Evidence from masked priming experiments

*Harald Clahsen, University of Potsdam*

Realization-based theories of morphology assume specific morpholexical representations for derived words that distinguish them from the products of inflectional or paradigmatic processes. Experimental psycholinguistic studies, by contrast, have examined surface level and meaning-level properties of morphologically complex words, without paying much attention to the morphological differences between inflectional and derivational processes. In this presentation, I will report results from a series of masked priming experiments investigating the processing of inflectional and derivational phenomena in native (L1) and non-native speakers (L2) of typologically different target languages. The results were consistent across different target languages and different L1 backgrounds showing priming contrasts between inflection and derivation. These contrasts (which were particularly striking for the L2 groups) provide support for the proposal that derived and inflected words have different morpholexical representations and that these affect online processing, both in the L1 and the L2.

**The Connectives**

**Lloyd Humberstone**

A comprehensive investigation of the sentence connectives—and, or, if, not—with special attention to their logical properties.

**Edge-Based Clausal Syntax**

A Study of (Mostly) English Object Structure

**Paul M. Postal**

“*Edge-Based Clausal Syntax* puts the study of English objects on new footing. A goldmine of hitherto unrecognized generalizations, it provides a rigorous and unflinching account within Metagraph Grammar and thereby challenges more widely accepted approaches to do equally well.”

— Judith Aissen, University of California Santa Cruz

472 pp., 49 illus., \$35 paper

**Provocative Syntax**

**Phil Branigan**

“[A] desperately needed breath of fresh air for Minimalist syntax’s model of movement. ‘Provocation’ is an exciting alternative to the EPP that is still well-grounded in Chomskyan tradition. This book is a must-read for anyone dissatisfied with motivating movement via uninterpretable features”

— Daniel Siddiqi, Carleton University

Linguistic Inquiry Monographs 61 • 184 pp., 1 illus., \$30 paper

**Bilingual Competence and Bilingual Proficiency in Child Development**

**Norbert Francis**

“This exceptional book offers a wealth of information on crucial aspects of bilingualism. It combines a very careful examination of theoretical notions such as bilingual competence, bilingual proficiency, literacy and metalinguistic awareness with in-depth analyses of empirical data. It is an invaluable read for researchers in the fields of language acquisition, bilingual development, and language education as well as for language planners and educational authorities in areas that serve minority bilingual populations.”

— Liliana Sánchez, Rutgers University

424 pp., 18 illus., 3 tables \$55 cloth

**Anaphora and Language Design**

**Eric J. Reuland**

“[A] major theoretical achievement within the domain of research of minimalist syntax. It offers a number of fascinating insights into the ways in which what might appear as random crosslinguistic variation in the domain of anaphora can be successfully understood in terms of the interaction among the syntactic computation, the language interfaces, and the feature endowment of individual lexical items.”

— Denis Delfitto, University of Verona

Linguistic Inquiry Monographs 62 • 440 pp., \$35 paper

## Bilingual Development and Language Assessment

*Cornelia Hamann  
University of Oldenburg*

The situation of children growing up in multilingual settings is becoming more and more frequent. For many of these children, the acquisition of the national language begins with organized (pre-) school, which makes them early second language (L2) learners. This means that these children very often perform significantly below monolingual children on standardized language measures. This poor performance combined with the fact that areas of difficulty are often identical in bilingual children and children with Specific Language Impairment has been shown to lead to both over-diagnosis and under-diagnosis of SLI, with damaging consequences on the individual and social level. This talk explores similarities and differences in bilingual and impaired language development pointing out consequences for the search for clinical markers but also for theories of language development and impairment. I will also report on projects developing within and from COST 0804 which are addressing the problem in various ways, trying to further our understanding of what constitutes normal language development in bilingual/second language children and to develop crosslinguistic tools for language assessment. Especially the second goal calls for new measures and assessment procedures concentrating on tasks involving non-word or sentence repetition, executive function and linguistically complex constructions such as question formation and subordination.

POSTER SESSION II

Clitic production across tasks in young French-speaking children

*Mihaela Pirvulescu, University of Toronto - Mississauga*  
*Ana-Teresa Perez-Leroux, University of Toronto*  
*Yves Roberge, University of Toronto*  
*Nelleke Strik, University of Toronto*

Several experimental studies report optionality in object clitic production in early French L1 while these pronouns are obligatory in the target grammar. This presentation investigates the syntactic dimensions of the phenomenon of clitic optionality in children based on a minimalist analysis of the recoverability of silent arguments. A comparison between different elicitation methods (indirect address, direct address and manipulation of tense) reveals significant differences in clitic production across tasks. We propose an analysis where linking to discourse is pragmatic, but is represented syntactically (Sigurdsson 2011). The early grammar has available a referential null object (along with the clitic construction, Pérez-Leroux et al. 2008) which must be C-edge linked in the left periphery. This approach refines a traditional view in acquisition that children allow argument drop because they over-rely on access to discourse (Allen 2000), by articulating a full syntactic account of how this happens.

POSTER SESSION II

Ambiguous anaphora in the L2 English and L2 Spanish

*Elena Valenzuela, University of Ottawa*  
*Juana Licerias, University of Ottawa*  
*Luz Patricia Lopez, University of Ottawa*

The Position of Antecedent Hypothesis (PAH) (Carminati 2002) argues that, in anaphoric constructions, null pronouns prefer the antecedent in Spec IP while overt antecedents prefer to be coindexed with the antecedent in object position. This asymmetry is based on the notion that null subject pronouns are less specified and therefore prefer subject (Spec IP) antecedents because they are more salient while overt subject pronouns prefer low salience antecedents. The present study explores to what extent this processing bias in null subject languages can be ‘delearned’ or ‘deactivated’. Data from a bidirectional study (L1 Spanish/L2 English and L1 English/L2 Spanish) which investigates the extent to which this antecedent bias can be deactivated. Data from four experimental tasks shows that both acquiring and delearning this discourse property are problematic for learners.

POSTER SESSION II

The acquisition of distributivity and plurality

*Elena Pagliarini, University of Verona*  
*Gaetano Fiorin, University of Utrecht*  
*Jakub Dotlacil, University of California-Santa Cruz*

Experimental studies show that the distributive reading of plural definite noun phrases (PDs) is degraded for adults. In this study, we tested the hypothesis that the distributive interpretation of PDs is degraded because of the competition with distributive quantifiers (DQs.) That is, the distributive reading of “the boys are building a boat” is degraded because there is a competing form, “each boy is building a boat”, which expresses that reading unambiguously. We administered a truth-value judgment-task to a group of Italian children aged between 4 and 13 years and a group of adults. In support of our hypothesis, the results show that (i) there is a significant correlation between the children’s ability to exclude the collective interpretation of DQs and their ability to reject the distributive reading of PDs and (ii) none of the children who rejected the distributive reading of the PDs accepted the collective reading of the DQs.

POSTER SESSION II

Modelling the acquisition of the English past-tense

*Emmanuel Keuleers, Ghent University, Belgium*  
*Ben Ambridge, University of Liverpool*

The acquisition of the English past-tense system has long been considered a central test case in the debate between “words and rules” and “analogical” approaches to language acquisition. Although there exist many previous experimental and modelling studies, the present study is the first to directly compare different computational models on their ability to predict children’s experimental judgment and production data (obtained at 6-7 and 9-10). Whilst both single-route (*k-nearest neighbor/exponential decay*) and multiple-rules models (Albright & Hayes, 2003) gave good coverage of the data, adding a default rule (add ‘-ed’) mechanism did not significantly improve model fit.

Phonotactic Interference and Performance Factors Trump Representational Deficits: Perception and Production of English Inflections by L1 Mandarin Speakers

Timothy Bonner, City University of New York - Graduate Center and Lehigh University

Sixty adult Mandarin-speaking learners of English (low and high proficiency) were assessed in their aural perception and oral production of English inflections using timed and self-paced experiment modules. Stimuli consisted of single word presentation (real and nonce words) and words within sentences. We hypothesized three factors to play a role: 1) L1 phonotactic constraints; 2) perceptual saliency; and 3) increased processing load. The results show increased error rates on target items that violate L1 phonotactic constraints in both tasks. However, instead of the expected omission of violating codas, devoicing of nearly all voiced obstruents in coda position was observed using PRAAT. Simplification of syllable final and word final consonant clusters via epenthesis and metathesis was also regularly observed. As expected, error rates on the sentence-level tasks increased due to greater processing load. The results will be discussed within a theoretical framework positing syntactic and phonological deficits in older L2 learners.

Alternates

Semantic bootstrapping and the role of meta-cognition

Neil Parr, University College London
Richard Breheny, University College London

Traditional accounts appeal to the idea that Verbs denote actions and Nouns denote entities. We propose that infants attend to and acquire the grammatical properties of word forms when describing complex events involving sub-events which are not currently in shared attention. Prior to that, infants' utterances focus on the 'here-and-now,' and infant uses of nominal and verbal forms lack their typical grammatical function. The development in usage from simple Manifest to Complex Events co-occurs with meta-cognitive abilities required to represent non-occurrent states. Our research shows that 18-30 month old infants make two kinds of complex utterance. One (INT) involves achievements, the other (RES), involves accomplishments. Each requires a predicate describing the state change and a means to refer to a Theme 'measuring out' the change; in effect, the use of [V]erbs and [DP]s. Our presentation will describe analysis supporting the conclusion that Complex Events are the locus of early syntactic development.
