

## You Can Make a Difference in Brain Research

An Opportunity to Make America's Most Popular Sports Safer

### ***About our Study***

The Center for the Study of Traumatic Encephalopathy (CSTE) at BU School of Medicine is conducting nationally renowned, state-of-the-art research examining current and former professional and amateur athletes who are at risk for developing the neurodegenerative disease called Chronic Traumatic Encephalopathy (CTE). This disease is caused by repetitive brain trauma (including concussions and subconcussive blows) and has been the focus of many of the changes in public awareness and policy.

### ***Help Find the Answers***

- Great experience for those hoping to pursue a career in medicine, neuroscience, neuropsychology, and other related fields
- Gain exposure to neurodegenerative diseases and neuropsychology
- Conduct interviews with former athletes and future brain donors

### ***Join our Team***

Volunteer position available for an enthusiastic undergraduate, recent college graduate or graduate student

- 1-year commitment
- 20+ hours a week

**Please send questions and applications (a cover letter and a resume/CV) to:**
