

Principles of Economics in Context (Goodwin, et al.), 1st Edition

ERRATA

Some print runs of *Principles of Economics in Context* have errors which have been corrected in later print runs. For those who have copies of the earlier versions, here are the errors and corrections:

p. 71: Review Question 8 should read: “What are some major characteristics of the business sphere?”

p. 72: Title at the top should be “Exercises” (without the extra “c” – we do know how to spell, but this is a typographer’s error!) and Exercise 1b should read “unemployment rate during 2005-2012.”

p. 109: Exercise 2 should read “words” not “worlds”.

pp. 150: Exercises numbered 3-6 should be numbered 4-7.

p. 489: Reference in Table 22.1 note to Chapter 2 should be to Chapter 20.

p. 529: last paragraph should read “...the notion of labor flexibility, discussed in Chapter 10.”

p. 745: Exercise 3 references should be to Table 32.2 and Figure 32.5, and dates should be 2011 and 1990-2011.
