Dear Professor Lang,

Industrial Economics, Incorporated (IEc) is looking for your assistance as we work to attract top graduate students to our firm. In the past several years, professors, professional colleagues, and former employees have provided us with recommendations and referrals for their best students who are eager to work in economic and environmental consulting. We value these referrals and have been very successful in finding excellent employees because of them.

IEc will begin to review and screen candidates immediately, with an eye to recruit several Associates (with graduate degrees).

For our Associate search, we are currently focusing on folks with graduate degrees in the areas of economics, finance, Energy, public policy and related fields.

We are looking for both immediate and spring 2023 hires, though timing is flexible.

Please encourage your students, friends, or colleagues interested in a career in economic and environmental consulting to visit our web site at [www.indecon.com](http://www.indecon.com).

If you have any questions, please email me at [lozza@indecon.com](mailto:lozza@indecon.com).

Thank you for your help in spreading the word.

Sincerely,

Lauren Iozza
