Open Faculty Positions

CHIPPING IN

Efficiently Secure Computing: In Part One of our series highlighting BU ECE's contributions to research and education under the umbrella of the CHIPS and Science Act of 2022, [Professor Ajay Joshi](#) and his research group are working to address a cloud computing quandary: how can we improve computational efficiency *without* sacrificing security?

ECO-ECE

Garbage to (Bio) Gold: Professors [Rabia Yazicigil](#) and [Douglas Densmore](#) are contributing their respective specialties to the multi-disciplinary, multi-sector BioMADE consortium of researchers, brought together under a \$3M industry grant to develop smarter, more efficient bioreactors for converting waste to useful products.

ENGINEERING HEALTH

AI to Ease High Blood Pressure: "Our data-driven model is not just predicting an outcome, it is suggesting the most appropriate medication to use for each patient," according to [Professor Ioannis Paschalidis](#), who is collaborating with physicians and fellow data scientists on the project.

[Learn More](#)

The Call is Coming from Inside: A smart pill no bigger than a blueberry can withstand the stomach's acidic fluids, detect signs of gastrointestinal trouble, and send warning signals to an ordinary smart phone, according to the results [Professor Rabia Yazicigil](#) and colleagues shared in *Nature*.

[Learn More](#)

Ultrafast Lasers Can Speed Up Biological Research: [Professor Michelle Sander](#) and her lab group at Boston University are seeking out new ways to build ultrafast lasers – lasers that emit such short-lasting pulses of light that their duration is difficult to fathom.

ACHIEVEMENTS

- **Stepping Up:** Professor Ayse Coskun has been appointed as the College of Engineering's Interim Associate Dean for Research and Faculty Development.
- **Innovator of the Year:** Professor Ji-Xin Cheng was honored for his accomplishments as a prolific trailblazer who has excelled at bringing his imaging breakthroughs from research to industry.
- **Industrial Impact:** Unchained Labs recently acquired NanoView, a start-up founded by BU ECE alum George Daaboul (ENG'09, 13) around technology he originally developed as a student in Professor Selim Ünlü's lab.
- **A "Fuzzy" Method, Clarified:** BU ECE alum Sadullah Canakci (PhD'22) and co-authors, including former advisors Professors Ajay Joshi and Manuel Egele, received a Best Paper Award at IEEE HOST 2023 for their work on hardware fuzzing.

Distinguished Faculty

- 4 National Academy Members
- 3 Current/Former IEEE Society Presidents
- 50 Society Fellows
- 30 NSF, DOE and DOD Early Career Awards
- 40 Average H-Index per Faculty
- 8,500 Average Number of Citations per Faculty
- 51 Tenure-Track Faculty

RESEARCH FUNDING
