

Key performance indicators for sustainability at the Geneva residence

Water

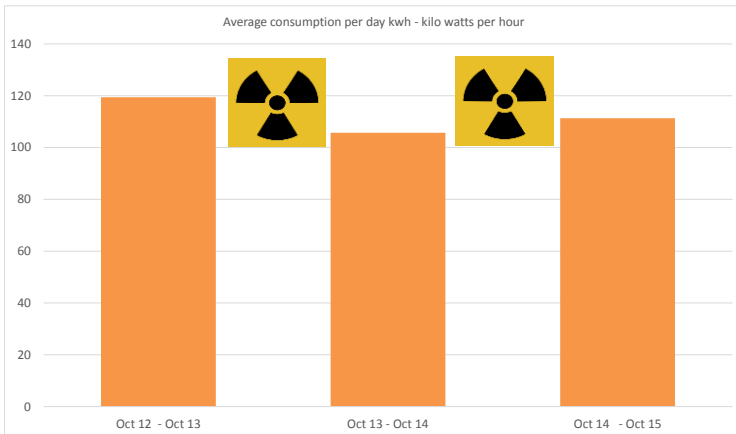

An olympic size pool contains 660000 US gallons

Paper

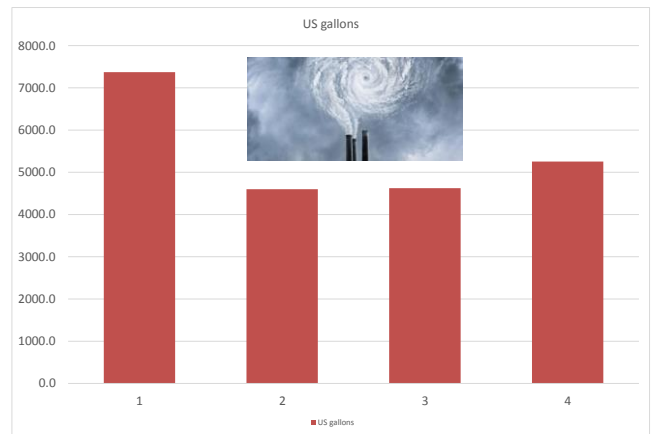

1 pine tree produces approx 104000 A4 sheets

Electricity

A 20 watt ceiling bulb uses 0.5 KWH of electricity per day
Only 15% of our electricity comes from renewable sources

Fuel - Heating and Hot water

1 gallon of fuel oil burnt produces 22.29 pounds of CO2

Glass Recycled

Year Glass containers

2013	42
2014	42
2015	30

Every glass bottle recycled saves enough energy to power a ceiling light for 20 hours

Trash not recycled

Year 110 litre trash bags

2014	302
2015	296

10 tonnes of CO2 emitted from the Geneva carbage incinerator every year

sustainability @BU It's what you *do*.
