

## Complete your Radiology Test and Lab Work at Boston Medical Center

### RADIOLOGY

Boston Medical Center offers a full-service Radiology Department at which you can complete all of your imaging studies. You, or your referring physician, can call 617-414-XRAY (9729) to schedule your test. When you call, please have your referral/authorization and your insurance card with you. Imaging studies performed include, but are not limited to:

- CT Scan
- Magnetic Resonance Imaging (MRI)
- Mammography and Breast Imaging
- Molecular Imaging and Nuclear Medicine
- PET / CT
- Ultrasound
- X-Ray

Because radiology services are provided in several places on the BMC campus, you will be told the exact location of your test when your appointment is scheduled.

### LABORATORY WORK

Boston Medical Center offers several walk-in laboratories for people who need to have blood work performed. Individuals are seen on a first-come first-served basis and should bring their lab orders and insurance cards.
