

PHOTONICS/CHEMISTRY POSTER SESSION

RET/REU Poster Session

August 7, 2015

11 a.m.—1 p.m.

Room 906

9th Floor

Photonics Center

8 Saint Mary's Street

*Coffee and light
refreshments will be
served.*

The Photonics Center and the Chemistry department are hosting a Research Experiences for Teachers (RET) and Research Experiences for Undergraduates (REU) poster session on August 7, 2015 from 11 a.m. to 1 p.m. The poster session will feature 11 Photonics RETs, 11 Photonics REUs and 12 Chemistry REUs. The RETs are from local area middle and high schools where they teach science and engineering classes. The REUs are undergraduates from around the country with an interest in STEM.

The Photonics RETs and REUs are conducting nanotechnology research this summer in Photonics labs, and the Chemistry REUs are focusing on the chemistry behind biological challenges. The participants will showcase their research in the poster session, and look forward to a discussion with the BU community.
